Manage Grazing to Restore Soil Health, Ecosystem Function & Climate Resilience

Dr Judi Earl | 19 Nov. 2024
Southern Cross University, Lismore

*Image above: Judi's property,
'Glen Orton' near Coolatai, NSW in 2011*

Join us for workshops with pasture ecologist and grazer, Dr Judi Earl. Judi will share insights into managing for soil health and ecosystem function on grazing lands. Through her extensive experience in land planning and holistic management, Judi can guide you towards unleashing the full potential of your land and enterprise. The key to climate resilience lies in healthy soils and thriving ecosystems within a thoughtfully designed-for-purpose property.

After advising and training hundreds of graziers and land managers, Judi decided it was time to put the principles into practice.

The purchase of 'Glen Orton' – 'the GO' – (pictured

above) near Coolatai, NSW in 2011 provided the perfect opportunity to showcase the capacity.

WORKSHOP 1 Grazing for Soil Health and Resilient Pastures

19. Nov. 24 – 9.00 AM – 12.30 PM

- The importance of plants for soil health
- How defoliation effects plant roots
- Grazing management for optimal pasture growth and production

WORKSHOP 2 Create your Best Property Plan

19. Nov. 24 – 1.30 PM – 5.00 PM

- Key principles for property planning
- Steps for creating your best property plan
- Practical tips for cost effective fencing and water options

Manage Grazing to Restore Soil Health, Ecosystem Function for Climate Resilience with Dr Judi Earl

About Judy:

Judi gained a PhD in pasture ecology when she conducted the first studies describing the benefits to pasture composition from planned grazing. She has extensive experience in how grasslands and pastures respond to grazing and fertility management and is a widely respected speaker on these matters.

These workshops offer a valuable opportunity to connect with Judi and gain insights into managing for soil health, ecosystem function, land productivity, and climate resilience.

Her engaging presentation style, farming experience, and real-world examples will equip attendees with valuable strategies for enhancing pasture composition and land health.
